

ADRIAN PALČIĆ

FRONT-END WEB DEVELOPER

MY GOAL

I'm a passionate web developer with a love for transforming ideas into sleek, high-performing applications. With a strong foundation in HTML, CSS, JavaScript/TypeScript, and a deep commitment to React.js. My goal is to join a dynamic team where I can contribute to projects that not only challenge me but also make a real difference to users. I'm always excited to bring fresh ideas to the table and help shape products that stand out for their usability and impact.

PROJECTS

VIRTUAL CAFFE

An application that replicates the café where I worked, enabling efficient order tracking and table management. It features a wallet simulation and an overview of orders by table, enhancing user experience and organization.

E-COMMERCE WEB-PAGE

I am developing a modern e-commerce platform for a real company that includes secure user authentication and attractive product listings. This project offers growth potential and adaptation to market needs.

INSTAGRAM CLONE

A full-stack web application that utilizes Firebase and Zustand to provide social media functionality. It allows users to register, log in, and interact through posting, liking, commenting, following and searching other users while emphasizing user experience and speed.

SKILLS

**JAVASCRIPT/TYPESCRIPT, REACT, CSS, TAILWIND CSS(SCSS),
HTML, DOCKER, MONGO DB, SCRUM GIT, GITHUB, VITE, SQL,
ZUSTAND, REDUX, NODEJS, FIGMA**

ABOUT ME

Starting my career as a waiter, I developed an interest in programming, which soon became a hobby and a valuable skill in my daily life. To ease my work, I created "Virtual Caffe," an application that simplifies order tracking and table management, reducing the need to remember details and increasing efficiency. This project reflects my commitment to solving real-world challenges using innovative technology.

EDUCATION

SREDNJA ŠKOLA PAVLA RITTERA VITEZOVIĆA, SENJ

Computer Science technician

2016/2017 - 2019/2020

CERTIFICATIONS

**FRONT END DEVELOPMENT
LIBRARIES** - FreeCodeCamp,
[2024]

My interests are focused on web programming. I love the process of building websites and applications, and I enjoy tackling challenges to create functional solutions.
